Dear DOJ,

Thanks for caving in on the Microsoft case....you should hang your heads in shame! Failure to stop this monopoly legally will cause incredible damage. When hackers eventually try to bring down the web, Microsoft will be their weapon.

I wonder how much of a bribe Gates delivered to the AGs for their next campaign war chest....your department is as crooked and reprehensible as Microsoft. It's the obviously poor "decisions" like this one that give scum like Gates and Ballmer, and their equally scummy counterparts in Washington the reputations as thieves and liars which they so richly deserve.
